

Table SII. Correlation matrix between QualiPso factors. The last line of each column shows intraclass correlations between the measure of each factor

	Factor 1: Social life	Factor 2: Mental health	Factor 3: Treatment outcome	Factor 4: Skin symptoms
Factor 1: Social life	1.000			
Factor 2: Mental health	0.210	1.000		
Factor 3: Treatment outcome	0.065	0.415	1.000	
Factor 4: Skin symptoms	-0.144	0.468	0.358	1.000
Intra-class correlations (n=70)	0.735*	0.720*	0.718*	0.709*

* $p < 0.001$.
