

Fig. S3. (a) Total number of infiltrating cells, and percentage of dermal cells immunoreactive for (b) CD45RO and (c) CD68 in different skin diseases with a Th2-weighted inflammation. Asterisks indicate differences between atopic dermatitis and the other skin diseases, respectively (\* $p < 0.05$ , \*\* $p < 0.01$ , \*\*\* $p < 0.001$ ). Error bars indicate standard errors of the mean (SEM).
