

Table SI. Classification of skin pathologies presenting as an isotopic response, following infection with either herpes zoster ( $n = 180$ ) or herpes simplex virus (HSV) ( $n = 14$ ) (3, 4, 13, 26–42)

Isotopic response after herpes zoster or HSV cases	Case, n (n=194)
Granulomatous reactions	60
Granuloma annulare	31
Granuloma, not further defined	12
Granulomatous vasculitis	6
Sarcoidosis	5
Granulomatous folliculitis	3
Tubercloid granulomas	2
Rosai-Dorfman	1
Dysimmune reactions	45
Lichen planus	13
Graft-versus-host disease	8
Lichen sclerosus et atrophicus	5
Erythema annulare centrifugum	3
Morphea	3
Linear IgA dermatosis	2
Allergic contact dermatitis	2
Erythema multiforme	2
Eosinophilic dermatosis	2
Stevens–Johnson syndrome/toxic epidermal necrolysis	2
Drug eruption	2
Psoriasis vulgaris	1
Malignancies	32
Breast carcinoma	15
Squamous cell carcinoma	6
Basal cell carcinoma	5
Beso-squamous carcinoma	2
Angiosarcoma	1
Kaposi sarcoma	1
Malignant melanoma	1
Skin metastasis	1
Leukaemic or lymphomatous infiltrations	19
Lymphoma or pseudolymphoma	10
Leukaemic infiltration	9
Infectious	15
Dermatophytosis	7
HPV	5
Furunculosis	2
Molluscum contagiosum	1
Various	23
Comedones	9
Acne	3
Cutaneous mucinosis	1
Acneiforme lesions	1
Reactive perforating collagenosis	1
Nodular solar degeneration	1
Keloid	1
Rosacea	1
Milia	1
Prurigo	1
Tufted angioma	1
Poliosis	1
Cysts	1
