

Table SI. Cytokines' interaction with different receptors

	IL10	IL19	IL20	IL22	IL24	IL26	IL28B	IL29
IL10RA	●							
IL10RB	●			●		●	●	●
IL20RA		●	●		●	●		
IL20RB		●	●		●			
IL22RA1			●	●	●			
IL22RA2				●				
IL28RA							●	●

IL10 family cytokines have shown to define their role through different receptors by partly sharing receptor subunits or whole receptor complexes (9, 10).
