

Fig. S2. Summary of the numbers of CD8<sup>+</sup> cells, granulysin-bearing cells, TIA-1<sup>+</sup> cells and Foxp3<sup>+</sup> cells in the samples from pre- and post-PEG-IFN- $\alpha$ 2a therapy. Three representative fields of each section were selected from the dermis associated with dense dermal lymphoid infiltrate. The number of immunoreactive cells was counted using an ocular grid of 1 cm<sup>2</sup> at a magnification of  $\times 400$ . The data are expressed as the means SD of the numbers in each area. \* $p < 0.05$ .
