

Fig. S1. Changes in lichenification scores during study FLT001, a 4-week multicentre double-blind study to compare safety and efficacy between once daily (OD) and twice daily (BD) administration of fluticasone propionate cream in the treatment of atopic dermatitis. Lichenification criteria: 0: absent, 0.5: very mild, 1.0: mild, 1.5: mild to moderate, 2.0: moderate, 2.5: severe, 3.0: very severe.
