

Table SIII. Elements of the random disturbances around the mean regression lines, represented by the between-subjects variability of intercepts and slopes and by the within-subject variability of the serially correlated residuals

Variability parameter	FLT001	FLT002	FLT401	3 studies
Between-subjects model variability				
Standard deviation (intercept)	0.385	0.247	0.737	0.496
Standard deviation (slope)	0.248	0.235	0.330	0.270
Correlation (intercept, slope)	-0.23	0.92	-0.65	-0.30
Within-subjects residual variability				
Autocorrelation (1 st order)	0.51	0.37	0.48	0.45
Standard deviation (residual)	0.498	0.441	0.419	0.451
