

Fig. S1. Dermoscopic images of 4 *de novo* melanomas showing Blue white veil. Globules (+1) and Blue whitish veil (-1) with a Score for Algorithm I of 0 and for Algorithm II +1 (a, b). Streaks (+1) and Blue whitish veil (-1) with a Score for Algorithm I of 0 and for Algorithm II +1 (c, d). All lesions were true negatives (no melanomas arising in a naevus) for Algorithm I and false positives for Algorithm II.
