

Fig. S2. (f) Non-edged papillae at the dermal-epidermal junction (basic image, 0.5×0.5 mm). (g) Large tumour nests showing a palisading appearance at the lower epidermal levels (basic image, 0.5×0.5 mm). (h) Canalicular vessel (*red arrow*) (basic image, 0.5×0.5 mm). (i) Multiple melanophages at the dermal-epidermal junction, seen as bright round structures (basic image, 0.5×0.5 mm). (j) Bright reticulations at upper dermis related to dense collagen bundles (basic image, 0.5×0.5 mm).
