

Table SI. Baseline population characteristics

	Controls (n = 40,560)	Atopic dermatitis (n = 8,112)
Age, mean (SD)	42.4 (15.1)	42.4 (15.1)
Sex, n (%)		
Women	24,910 (61.4)	4,982 (61.4)
Men	15,650 (38.6)	3,130 (38.6)
Socioeconomic status, n (%)		
1	8,177 (20.2)	1,557 (19.2)
2	8,004 (19.7)	1,731 (21.3)
3	8,095 (20.0)	1,639 (20.2)
4	8,366 (20.6)	1,368 (16.9)
5	7,918 (19.5)	1,817 (22.4)

An age-standardized socioeconomic level was calculated based on the tax reported mean household income up to 5 years before study inclusion. Mean tax-reported income was divided into quintiles, where level 1 represents the lowest and level 5 represents the highest quintile.
SD: standard deviation.
