Supplementary material to article by M. H. E. Jansen et al. "Bowen's Disease: Long-term Results of Treatment with 5-Fluorouracil Cream, Photodynamic Therapy or Surgical Excision"

BD: Bowen's disease; SCC: squamous cell carcinoma; LTFU: lost to follow-up immediately post treatment; MUMC: Maastrich University Medical Centre.

*In 107 cases (65%) the histopathological diagnosis on biopsy was an invasive tumour (e.g. SCC, BCC) but the excision showed BD next to the invasive tumour; in 18 cases (11%) the biopsy showed BD, but the excision specimen contained an invasive tumour; in 37 cases (23%) the initial histopathological diagnosis on biopsy could not exclude invasive malignancy but the excision specimen showed an invasive tumour.

Fig. S1. Flow chart of the cases included.
