

**Fig. S1.** AS-PCR for *D816V*. Ladder marker 50 bp (L), wild type DNA from saliva (Lines 1, 2), DNA from saliva isolated from twins (Lines 3, 4, 5, 6), DNA from *D816V* carriers (7-14), sample without DNA (Line 15) (2% agarose gel). PCR products were amplified with *D816V* specific primer in lines 4, 6, 8, 10, 12 and 14.
