

**Table SIV. Notable laboratory findings**

Variables (units)	All patients n (%)**	Isolated CSU n (%)	CSU-CIndU n (%)	p-value*
Phosphatase alkaline (> 110 U/l)	129/405 (31.9)	106/324 (32.7)	23/81 (28.4)	0.4553
Anti-thyroid peroxidase antibodies (> 45 U/ml)	77/378 (20.4)	65/296 (22.0)	12/82 (14.6)	0.1450
Anti-thyroglobulin antibodies (> 50 U/ml)	46/373 (12.3)	40/291 (13.7)	6/82 (7.3)	0.1179
Antinuclear antibodies (1/> 40)	48/155 (31.0)	41/122 (33.6)	7/33 (21.2)	0.1719
IgE (> 100 kU/l)	185/418 (44.3)	141/330 (42.7)	44/88 (50)	0.2223
D-dimer (> 300 ng/ml)	29/92 (31.5)	21/69 (30.4)	8/23 (34.8)	0.6975

\*p-value corresponds to the comparison between isolated-chronic spontaneous urticaria (CSU) and CSU with concomitant inducible urticaria (CSU-CindU) subgroups. \*\*Variable sample size depending on availability of the result of each test.
