<sup>a</sup>Continuation of the trial of Kaufman et al. (1998) (18). <sup>b</sup>Continuation of the trial of Price et al. (2002) (17). <sup>c,d</sup>Owing to the heterogeneity of its study population, this study was omitted from the sensitivity analysis. <sup>e</sup>The only study in which the safety profile of 1 mg/day finasteride, 0.5 mg/day dutasteride, and placebo was simultaneously compared.

5-ARIs: 5α-reductase inhibitors; FMPHLSG: Finasteride Male Pattern Hair Loss Study Group; NR: not reported.
