

**Rosacea prone
sensitive skin**

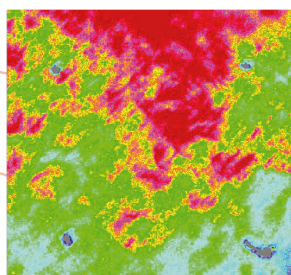

Relief concentrate for chronic redness

Targeted action on stubborn redness

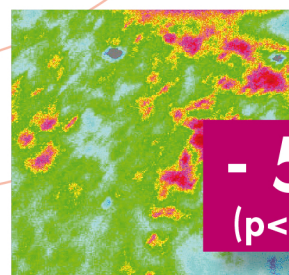

Its exclusive formula combines a special concentrated Ruscus extract enriched with vasoconstricting saponins, vascular protective Hesperidine Methyl Chalcone, and decongesting Dextran sulfate, as well as Avène's soothing, anti-irritating Thermal Spring Water.

Visible efficacy in just 1 month (1)

After just one month using Relief concentrate for chronic redness, a 50% reduction in microcirculation (concentration in red globules) was observed, directly linked to skin redness.
