World Congress is Approaching

On July 1-5, 2002, the XXth World Congress of Dermatology will take place in Paris. Nearly 2,500 abstracts have been received by the organizers and this indicates a strong interest in participating. More than 4,000 hotel rooms are already booked. The French organizers hope for a strong Nordic presence. Being the first World Congress of the New Millennium and with new treatment options for our patients from topical immunomodulators to the latest developments in laser technology and treatment options, there will be enough for any interest in dermatology and venereology.

An important part of the meeting is the General Assembly of Delegates of the International League of Dermatological Societies. There will be two assembly meetings in Paris, July 2nd and July 4th. At the first meeting delegates have to vote for the location of the WCD in 2007. Two societies have prepared a bid: The Argentinian Dermatology Society, who wishes to have the congress in Bueno Aires, and the Canadian Dermatology Society, who wishes to host the congress in Vancouver. A simple majority will give us the result. At the first assembly meeting the delegates will be given lists of name of nominees for board membership of the International Committee of Dermatology - the board of the ILDS. The following changes will take place among the board members: Terrence Ryan, Hans

Rorsman and Ramon Ruiz-Maldonado are leaving the board, Dr Maria Duran from Columbia unfortunately died in 2000 and was not replaced. Dr Steve Katz and Dr Nishikawa will leave as regular board members, but stay on the board as ex officio members for another 5 years. In case Canada wins the bid the ILDS bylaws demands that David McLean will switch his position to an ex officio member meaning there will be a 7th place on the board.

The list of nominees will be shown on the ILDS website 45 days before July 1, when there is a deadline for further candidates (visit www.ilds.org).

I hope you will consider to participate
in Paris.
