

**Fig. S2.** The most-limited activities and restricted participations in patients with myalgic encephalomyelitis/chronic fatigue syndrome (ME/CFS). Data presented as median of International Classification of Functioning, Disability and Health (ICF) categories impaired in over 75% of patients.  $n = 87-100$ . The y-axis indicates Activities/Participation: d230 (carrying daily activities), d240 (handling of stress), d620 (acquisition of goods and services), d630 (preparing food), d640 (doing housework), d660 (assisting others), d850 (remunerative employment), d920 (recreation and leisure) and d9205 (informal socializing). The x-axis indicates ICF qualifiers: 0 (no limitation/restriction), 1 (mild limitation/restriction), 2 (moderate limitation/restriction), 3 (severe limitation/restriction) and 4 (complete limitation/restriction).
