

Table SIV. Association between atopic dermatitis (AD) and contact allergy to aluminium in exposed and unexposed individuals. p-values were obtained from Fisher's exact test

Groups	AD		Total	p-value
	Yes	No		
Exposed	50	79	129	
Aluminium-positive	4	0	4	
Aluminium-negative	46	79	125	0.021 <sup>a</sup>
Unexposed	31	37	68	
Aluminium-positive	2	2	4	
Aluminium-negative	29	35	64	>0.3 <sup>b</sup>

Comparison of aluminium allergy in <sup>a</sup>exposed individuals and <sup>b</sup>unexposed individuals with and without AD.
