

Fig. S1. Number of days off work in the previous 6 months owing to psoriasis in: (a) all Nordic respondents; and (b) Nordic respondents by achievement of clear/almost clear skin outcome. 35% of patients (40% of women and 27% of men) needed ≥ 1 day off work in the last 6 months due to their psoriasis. Patients were asked how many days, if any, in the previous 6 months they had had off work because of their psoriasis.
