

Table SI. List of drugs associated with the induction of bullous pemphigoid according to their class

NSAIDs		
Azapropazone	Salicylates	Diuretics
Celecoxib	Aspirin	Bumetanide
Diclofenac	Sulfasalazine	Furosemide
Ibuprofen	Salicylazosulfapyride	Hydrochlorothiazide
Mefenamic acid		Spironolactone
Mesalazine		
Phenacetin		
Cardiovascular		
<i>Ace inhibitors</i>	<i>Calcium channel blockers</i>	<i>Statins</i>
Captopril	Amlodipine	Rosuvastatin
Enalapril	Nifedipine	
Lisinopril		<i>Anticoagulants</i>
<i>Angiotensin II agonists</i>	β -blockers	Enoxaparin
Losartan	Metoprolol	
Valsartan		
Antibiotics		
Actinomycin D	Anti-diabetics	Neurologic / Psychotropics
Amoxicillin	Alogliptin	Amantadine
Ampicillin	Anagliptin	Doxepin
Cephalexin	Linagliptin	Escitalopram
Chloroquine	Sitagliptin	Fluoxetine
Ciprofloxacin	Teneligliptin	Flupenthixol
Griseofulvin	Vildagliptin	Gabapentin
Levofloxacin		Galantamine hydrobromide
Metronidazole	Anti-rheumatics	Levetiracetam
Novoscabin (benzyl benzoate)	D-penicillamine	Risperidone
Penicillin	Tiobutaryl	
Rifampicin		
Terbinafine		
Biologics		
<i>Anti-TNFA</i>	<i>PD-1/PD-L1 inhibitors</i>	<i>m-TOR inhibitor</i>
Adalimumab	Atezolizumab	Everolimus
Efalizumab	Durvalumab	Sirolimus
Etanercept	Nivolumab	
Infliximab	Pembrolizumab	<i>Interleukins/IL-antagonists</i>
<i>Tyrosine Kinase Inhibitors</i>	<i>CTLA-4 inhibitors</i>	Aldesleukin (IL-2)
Erlotinib	Ipilimumab	Ustekinumab
		<i>BRAF inhibitors</i>
		Dabrafenib
Vaccines		
Hepatitis B	Others	
Herpes zoster virus	Anthralin (dithranol)	Nadolol
Hexavalent combined vaccines	Arsenic	Omeprazole
Influenza	Biostim [®]	Photodynamic therapy
Rotavirus	Coal tar	Placental extracts
Swine flu	Complementary medicines	Psoralens with UVA (PUVA)
Tetanus	Dorzolamide	Serratiopeptidase
	Iodide	Timolol
	Metamizole	

NSAIDs: non-steroidal anti-inflammatory drugs.
