

Table SI. Frequency and duration of scratching behaviour observed during the control and reinforced test phase trials, by group and trial type

Trial type	Classical conditioning		Observational learning		Sham conditioning	
	Control	Reinforced	Control	Reinforced	Control	Reinforced
Frequency of scratching behaviour, number of instances, mean (IQR)	2 (3)	2 (3)	0 (1)	0 (1)	0 (2)	0 (1)
Duration of scratching behaviour, seconds, mean (IQR)	4.1 (7.4)	3.9 (11.3)	0 (1.7)	0 (1.4)	0 (9.2)	0 (3)

IQR: interquartile range.
