

Table SI. Clinical and serological characteristics of 20 adult patients with eruptive pseudoangiomatosis (EPA)

Patient	Age (years), sex	Month of observation	Hospital department and reason for admission	Comorbidities	Lesion location	Serology
1	69, F	July	Orthopaedics; fracture	Osteophytic spondyloarthritis with discopathies	Upper limbs	Negative
2	88, F	July	Orthopaedics; infected femur fracture	Rheumatoid arthritis, cachexia, chronic ischaemic heart disease, senile dementia, decubitus ulcer	Face, neck	Negative
3	47, M	July	Orthopaedics; left tibial fracture	Ankylosing spondylitis, chronic liver disease, arterial hypertension, GERD, hiatal hernia	Upper and lower limbs, trunk	Negative
4	84, F	July	Orthopaedics; bilateral sacral wings fracture	None	Face, hands	Negative
5	64, F	July	Orthopaedics; right knee arthroplasty	None	Face	Negative
6	55, F	July	Orthopaedics; distal right fibular fracture	Arterial hypertension	Upper limbs	Negative
7	86, F	July	Orthopaedics; left greater trochanter fracture	COPD, chronic renal failure, heart failure, DM type 2	Face	Negative
8	45, M	July	Orthopaedics; herniated left disk with instability	Fibromyalgia, chronic herniated disc with paraesthesia	Upper limbs, knee joints	Negative
9	87, F	June	Pneumology; lung abscess, endobronchial infection with MRSA, <i>C. difficile</i> enteritis	DVT, diverticulosis, arterial hypertension, chronic vascular encephalopathy	Hands	IgG + for PVB19
10	88, M	July	Pneumology; mesothelioma and respiratory insufficiency	Arterial hypertension, diverticulosis, benign prostatic hyperplasia, spondyloarthritis, spondylodiscitis	Face	IgG + for PVB19
11	61, F	July	Pneumology; resistant <i>Corynebacterium</i> spp. Infection with bronchiectasis	GERD, metabolic syndrome, hyperuricemia, hepatic steatosis, insulin resistance	Hands, upper limbs	IgG + for PVB19
12	51, F	July	Pneumology; renal neoplasia with pleural and cutaneous metastases	Arterial hypertension, anaemia, chronic renal failure	Upper limbs	Positive circulating HHSV7 DNA, IgG + for PVB19
13	65, M	August	Pneumology; Chlamydia pneumoniae infection and pulmonary fibrosis	Chronic respiratory failure, arterial hypertension, metasterooid diabetes mellitus, osteoporosis	Hands, feet	IgG + for PVB19
14	69, F	July	Otorhinolaryngology; left parapharyngeal tumour and left paranasal sinusitis	COPD, chronic respiratory failure, hypothyroidism, seronegative spondyloarthritis	Ears, face, upper limbs	IgG + for CMV, EBV and PVB19
15	37, F	July	Otorhinolaryngology; tonsillectomy for recurrent tonsillitis	None	Face, upper limbs	IgG + for CMV
16	82, F	August	Orthopaedics; right femoral fracture	Arterial hypertension, chronic renal failure	Face, upper limbs, cleavage	Not performed
17	53, M	August	Haematology; hairy cell leukaemia	Arterial hypertension	Scalp, trunk (diffuse)	IgG and IgM + for PVB19, circulating PVB19 DNA
18	50, F	August	Dermatology; acute urticaria and angioedema	Acute arthritis, Baker's cyst rupture, arterial hypertension, metabolic syndrome	Upper and lower limbs, trunk	IgG and IgM + for PVB19, circulating PVB19 DNA
19	71, F	August	Dermatology; acute bacterial dermo-hypodermatitis	Arterial hypertension, depression	Face, dorsal hands	Negative
20	82, F	July	Dermatology; bullous pemphigoid	Alzheimer's disease, arthrosis, osteoporosis, iatrogenic hypothyroidism, secondary Parkinsonism	Face, cleavage, hands	Negative

M: male; F: female; GERD: gastroesophageal reflux disease; COPD: chronic obstructive pulmonary disease; DM: diabetes mellitus; DVT: deep-vein thrombosis; Ig: immunoglobulin; PVB19: parvovirus B19; EBV: Epstein-Barr virus; HHSV: human herpes virus; CMV: cytomegalovirus.
