

Fig. S1. Conumee plots of copy number variations (CNVs) located along the whole genome. Examples of conumee plots of: (A) an excellent responder (ER); and (B) a partial responder (PR) to anti-tumour necrosis factor (anti-TNF) drugs. *Blue lines* represent segments with the same CNV state, *dots* represent bins. *Green dots* represent CNV gains and *red dots* CNV losses.
