

Fig. S2. Conumee plots of copy number variations (CNVs) located along the whole genome. Examples of conumee plots of: (A) an excellent responder (ER); and or (B) a partial responder (PR) to adalimumab. *Blue lines* represent segments with the same CNV state, *dots* represent bins. *Green dots* represent CNV gains and *red dots* CNV losses. TNF: tumour necrosis factor.
