

## ERRATUM

In *Ekelund M, Mallbris L, Qvitzau S, Stenberg B. A Higher Score on the Dermatology Life Quality Index, Being on Systemic Treatment and Having a Diagnosis of Psoriatic Arthritis is Associated with Increased Costs in Patients with Plaque Psoriasis. Acta Derm Venereol 2013; 93: 684–688* errors in Table III have been detected.

We want to thank Dr Nazrul Islam (see Commentary S1<sup>1</sup>) for pointing out the erroneous *t*-values and *p*-values reported in Table III with the regression analysis. When we converted the original table from SEK to Euro, all 4 columns were mistakenly divided with

the exchange rate. The correct *t*-values and *p*-values should be:

Table III. *Regression analysis, Dermatology Life Quality Index (DLQI), psoriatic arthritis and being on systemic treatment in relation to total cost*

Variable	Df	Parameter estimate	Standard Error	<i>t</i> -value	Pr >  <i>t</i>
Intercept	1	245.1	576.7	0.42	0.6711
dlqi_tot	1	227.2	45.1	5.04	<0.0001
dum_psor	1	1,980.8	686.5	2.89	0.0042
systemic	1	2,451.3	684.0	3.58	0.0004

dlqi\_tot: continuous variable for DLQI score; dum\_psor: dummy variable for diagnosis of psoriatic arthritis; systemic: dummy variable for the patient being on systemic therapy.
