ERRATUM

In: Eriks-Hoogland IE, de Groot S, Post MW, van der Woude LH. Correlation of shoulder range of motion limitations at discharge with limitations in activities and participation one year later in persons with spinal cord injury. J Rehabil Med 2010; 43: 210–215 there is a mistake in the legend of Table II. The number of total patients should be 52 instead. The correct legend should read as follows:

Table II. Correlation of limitation of limited shoulder ROM at discharge with FIM motor score, wheelchair performance, PASIPD and transferring oneself 1 year later in the total study population (n = 146) and subjects with tetraplegia (n = 52). Level of significance: p < 0.05
